About me

I am a 5th semester student majoring Informatics Engineering from Indraprasta PGRI University, who has high motivation towards a growth mindset, has a good attitude, and has a high enthusiasm for learning. Currently I am looking for new challenges and opportunities to contribute with great enthusiasm. I am a pleasant person, adaptable, and can work in a team or individually. I have an interest in the fields of data analysis and software engineering, because previously I took courses on data analysis, software engineering, and I am interested in the fields of technology and information.
